Voice of Students

Studying in WIPO-Program has been an enriching and rewarding experience. It has opened the door to getting access to up-to-date IP knowledge and developing new skills. In spite of intensive coursework, it has been an invaluable opportunity to communicate with the most knowledgeable people in the field here. Meanwhile, the one-year study at WIPO-Program cultivates me with strong open mind

and ability to embrace diversity.

In short, studying in SICIP has proved to be a tremendously positive experience and an excellent starting point for my future career. I would like to recommend WIPO-Tongji program to anyone who is multilingual and interested in IP, especially, the international aspects of IP.

— *YANG Jing, From China, WIPO Program*

Since the courses are taught by international experts you have a chance to hear about their practical experiences. Also, you can always learn a great deal from the international students. In short, it is a wonderful opportunity for cross cultural exchange and experience. What's more, visits to different organizations such as courts, law firms and companies help the students to network and get in touch with future colleagues.

1. Tongji University

Tongji University (Tongji) is one of the leading universities in China. With a history of over a century, Tongji has become a comprehensive, international, research-oriented university with distinct features and global influence. In 2013, the university proposed its vision of “a sustainability-oriented, world-class university”. The university now registers 17,228 full-time undergraduate students, 13,864 graduate students, and 4,717 PhD candidates. Another 3,566 international students are pursuing their degrees here. With the support of the National Intellectual Property Administration, PRC (CNIPA) and the Max Planck Institute for Innovation and Competition of the Federal Republic of Germany, Tongji launched its Intellectual Property (IP) education and research in 2003.

Moreover, Tongji is the first University in China, who cooperates with WIPO in the form of joint master degree’s program, i.e. the Master Degree Program in Intellectual Property Law with Specialization in Design (MIP in Design), and who has been entrusted by the Chinese Ministry of Education (MoE) and the CNIPA to operate the “Belt and Road” Chinese Government IPR Scholarship Program (hereinafter: B&R MIP).

2. Shanghai International College of Intellectual Property

The Tongji Intellectual Property Institute (IP Institute), established in March 2003, cultivates inter-disciplinary talents in IP, law and management through high level Master, PhD and Post-doctor programs, taking advantage of Tongji University’s experts in the engineering discipline and through the cooperation platform with Germany (Europe).

Based on its IP Institute, Tongji established the Shanghai International College of Intellectual Property (SICIP) in November 2016, under the support of the World Intellectual Property Organization (WIPO), the CNIPA and Shanghai Municipal Government. As one of faculties of Tongji, the SICIP is responsible for operation of the MIP in Design and B&R MIP. The SICIP now owns several research and teaching platforms including the National Intellectual Property Strategy Research Base and the National Intellectual Property Training Base (Shanghai) etc., and hosts three major projects supported by the National Social Science Foundation of China. It also offers an Interdisciplinary Doctoral Program in IP filed with the Ministry of Education.

3. World Intellectual Property Organization (WIPO)

WIPO is the global forum for IP services, policy, information and cooperation. WIPO is a self-funding agency of the United Nations, with 191 members states. Its mission is to lead the development of a balanced and effective international IP system that enables innovation and creativity for the benefit of all. WIPO's mandate, governing bodies and procedures are set out in the WIPO Convention, which established WIPO in 1967. For detailed information about WIPO please visit: <http://www.wipo.int>

4. WIPO Academy

The WIPO Academy is the center of excellence for IP education and training for WIPO Member States, in particular developing countries, least developed countries (LDCs) and countries in transition. The Academy works to help build human capacity in IP, which is essential to innovation. Its four programs cover a rich portfolio of both general and specialized courses on IP, and cater to different target audiences. Courses combine face-to-face and distance learning methodologies, and are taught by IP experts. The aim of the University Partnerships program is to support access to IP higher education, especially to participants from developing countries, LDCs and countries in transition. One of the main means of achieving this aim is through the Joint Master's Programs on IP, offered in cooperation with selected academic institutions.

About the Program

Design is everywhere. From sophisticated pieces of contemporary art such as furniture or lighting displayed in museums to mundane items such as food containers or windshield wipers. Most things surrounding us are consciously crafted so as to please the eye while fulfilling their proper function is a language which, though rooted in the diversity and richness of cultural heritage, is understood universally and thus becomes a vehicle of intercultural exchange. This inherent capacity of borderless communication makes design a subject of truly international dimensions. Furthermore, design is not confined to configuration of the aesthetic and functional properties of individual products. It includes systemic thinking, interaction within and between different systems, modes of cooperation, and organization of processes. Understood in that broad sense, design is a crucial driving factor of innovation.

Comprehensive and dynamic concepts of design form the backdrop for this MIP in Design program. The program offers a unique and challenging opportunity for students not only to acquire solid knowledge in the core areas of IP , but also to focus on design protection in its many facets and stages. As this is a program offered in cooperation with WIPO, the international level will be covered extensively and comparative law aspects will be included, with European Union law serving as the primary paradigm of regional protection systems. The learning experience will be further enhanced and inspired by contributions from the College of Design and Innovation at Tongji University as well as by the involvement of specialized judges and practitioners experienced in the field.
